

Are we in your Bushfire Survival Plan?

Have you made a plan for the welfare of your pets and livestock in the event of a bushfire in your district?

- Have you prepared low fire risk areas for your livestock?
- Is there a safe area or enclosure for your pets?
- Have you decided on a trigger for moving your animals?
- Have you organised an alternative location - outside the threatened district - where you could move your pets and/or livestock?
- Do all your pets and livestock have adequate identification if they are lost or injured during a bushfire?
- Are your pet cases, animal/stock crates, horse floats and loading ramps all in good order and ready to go?
- Is your property registered with DPIPWE - does it have a Property Identification Code or PIC number?
