Endemic: end = endemic to Tasmania; tas = within Australia, only occurs in Tasmania; mi & tas = within Australia, only occurs on Macquarie Island and in Tasmania.

TSP Act = Tasmanian *Threatened Species Protection Act 1995*: r = rare, v = vulnerable, e = endangered, x = extinct

Threatened Species Section
Department of Primary Industries, Parks, Water and Environment

EPBC Act = Commonwealth *Environment Protection and Biodiversity Conservation Act 1999*: VU = Vulnerable, EN =Endangered, CR = Critically Endangered, EX = Extinct

[* = This taxon is protected as (1) it is either a component of a listed taxon, or the name has changed from that which appears in the official legislation, or (2) all taxa (species, subspecies or varieties) derived from this entity are listed as threatened species.]

Tas Count = number of records for the species within Tasmania, as per DPIPWE's Natural Values Atlas (excluding Macquarie Island).

LGA Count = number of records for the species within the specified local government area.

% in LGA = records within the local government area as a percentage of the total in Tasmania.

Disclaimer: The list above is based on records held in the Natural Values Atlas, and may include records that have a large degree of spatial uncertainty or that are known to be locally extinct. The number of records for a species does not necessarily equal the number of populations: that is, there may be more than one record per population. Note that records may have changed since this document was prepared. For further information check the NVA website at www.naturalvaluesatlas.dpipwe.tas.gov.au or individual species' information at www.dpipwe.tas.gov.au/threatenedspecieslists.
