

**Subject:** Keep the GMO ban in Tasmania  
**Date:** Sunday, 24 March 2019 3:14:57 PM

---

To whom it may concern,

It concerns me that Tasmania is going to destroy its uniqueness, pure clean water, healthy clean air, healthy naturally grown food by considering to allow GMO foods to be grown in this state.

Tasmania farmers might feel like they are doing it hard at the moment. What they don't realise is that more and more people are educating themselves about GMO foods, the risks of GMO foods to their health .

Your everyday people look to Tasmania as being unique, a leader in refusing to grow GMO foods . One of cleanest, pristine states of Australia. One of the reasons I moved to this state with my grandson.

To live in a state that is toxin free. GMO is a genetic toxin. That is why no insects Go near GMO produce.

Scientists are always going to go the scientific road, greed will always head in any directions which will give them \$ \$\$\$.

We as a nation have a moral obligation to our future generations, leaving them a state that is unique , food grown naturally.

Please take into consideration why GMO was banned initially in Tasmania. Keep the BAN of GMO produce grown in this amazing state of Australia.

Jenny
