

Thank you for the opportunity to comment on The Review of the Moratorium on Genetically Modified Organisms in Tasmania (2018).

Submission From: Ronald Aveling & Michele Diener
Organisation: Southern Wild (Co-Owners)

We are producers of organic, tasmanian-sourced fermented foods and support the extension of the GMO moratorium as it is in the commercial interests of our Tasmanian food business.

We market our products as GMO-free, and their primary ingredients are Tasmanian and Organic. Utilizing clean green Non-GMO Tasmanian organics gives us a competitive advantage and is strongly supported by our customer base.

Sincerely,

Ronald Aveling & Michele Diener
