Greyhound Breeders education package questionnaire

Unit 3 – Whelping the litter

Tick the box that corresponds with the correct answer to the following questions:

1. In the FIRST stage of labour it is normal for the breeding female to...

- A. Vomit
- B. Shiver
- C. Pant
- D. All of the above

2. What equipment will you need to have ready before your breeding female whelps?

- A. Newspapers with the staples removed
- B. Clean towels
- C. Note pad and pen
- D. All of the above

3. If the breeding female obviously has more pups to deliver, how long should you wait before you get concerned?

- A. 15 minutes
- B. If the bitch is relaxed – up to 3 hours
- C. If a pup can be seen – up to 3 hours
- D. See how she is in the morning

4. What should you ensure happens after each pup is born?

- A. The pup has a good drink of colostrum
- B. The breeding female has a drink
- C. The breeding female goes for a walk around the yard
- D. All of the above

5. How will you know when your breeding female is entering the second stage of labour?

- A. She reaches the date she is due
- B. She begins "nesting"
- C. She begins to have visible contractions
- D. She refuses her dinner

6. Where is a good place for the Whelping Box to be placed?

- A. A well lit, draft free place
- B. Outside in the bitch's run
- C. In the exercise yard
- D. In the busiest part of the house
