Purple Haze	12/05/2020	B	Deceased	Euth. - Illness/Age	23/11/2022	The greyhound failed to recover from desexing surgery. Blood chemistry revealed elevated blood creatinine 279 (27-124), urea 14 (2.5-8.9) and blood clucose 15.5 (3.3-6.1). It would appear that a combination of factors including withholding food and water (as per normal practice) pushed the greyhound in to a physiological crisis that caused her unexpected deterioration. Based on the results it was believed that there would be ongoing health issues. Subsequently the greyhound was euthanised.
