I. Overview

This document outlines requirements for importing and keeping wildlife in Tasmania in accordance with provisions of the *Nature Conservation Act 2002*. It is a guide to the arrangements applied by DPIPWE, and it provides detail of prior decisions and requirements that stakeholders must meet. It should be read in association with the *Policy on Importing (and Keeping) Vertebrate Wildlife in Tasmania*.

This guide is specific to the requirements of the *Nature Conservation Act 2002* and the associated *Wildlife (General) Regulations 2010* and *Wildlife (Exhibited Animals) Regulations 2010*. However, the requirements in this guide are not the only requirements that apply to importing and keeping wildlife in Tasmania. There are other requirements under the *Animal Health Act 1995* and the *Animal Welfare Act 1993*, as well as requirements of national legislation, such as the *Environment Protection and Biodiversity Conservation Act 1999*, and the legislation of other Australian states and territories.

This guide outlines requirements that apply to specific animals or groups of animals under the following headings:

- 3.1. Invertebrates
- 3.2. Amphibians
- 3.3. Reptiles
- 3.4. Birds
- 3.5. Mammals

Anyone seeking to import or keep wildlife in Tasmania should contact the Wildlife Management Branch and Biosecurity Tasmania to discuss the requirements that will apply.
