

Risk Assessment

The following risk assessment determines the risk of **Silvery gibbon** to Tasmania using the Bomford model (2008) and proposes assigned threat categories and import classifications for the species.

Species:		
Date of Assessment:	06 June 2019	
Literature search type and date:	Internet, species profile, library literature search.	
Factor	Score	
A1. Risk posed from individual escapees (0-2)	1	The animal can make unprovoked attacks causing moderate injury (requiring medical attention) or severe discomfort but is highly unlikely (few if any records) to cause serious injury (requiring hospitalisation) if unprovoked OR the animal is unlikely to make an unprovoked attack but can cause serious injury (requiring hospitalisation) or fatality if cornered or handled
A2. Risk to public safety from individual captive animals (0-2)	0	Nil or low risk (highly unlikely or not possible)
Stage A. Risk posed by individual animals (risk that a captive or escape animal would harm people)	Public Safety Risk Score = A1 + A2 = 1	Public Safety Risk Ranking A ≥ 2, Highly Dangerous A = 1, Moderately Dangerous A = 0, Not Dangerous = Moderately Dangerous
B1. Climate match score (1-6)	1	<1 No squares in the top 5 climate match classes
B2. Exotic population established overseas score (0-4)	0	No exotic populations have been established
B3. Overseas range size score (0-2)	0	<1 million km ²
B4. Taxonomic class score (0-1)	1	Mammal
Stage B. Likelihood of establishment (risk that a particular species will establish a wild population in Tasmania)	Establishment Risk Score = B1 + B2 + B3 + B4	Establishment Risk Ranking B = 11-13, Extreme B = 9-10, High

	=2	B = 6-8, Moderate B ≤ 5, Low =Low
C1. Taxonomic group (0-4)	0	Other Group - Primate
C2. Overseas range size (0-2)	0	<10 million square kilometres
C3. Diet and feeding (0-3)	0	Other herbivorous mammal or not a mammal
C4. Competition for native fauna for tree hollows (0-2)	0	Does not use tree hollows
C5. Overseas environmental pest status (0-3)	0	Never reported as an environmental pest in any country or region
C6. Climate match to areas with susceptible native species or communities (0-5)	0	The species has no grid squares within the highest five climate match classes that overlap the distribution of any susceptible native species or ecological communities
C7. Overseas primary production (0-3)	0	No reports of damage to crops or other primary production in any country or region
C8. Climate match to susceptible primary production (0-5)	0	None of the commodity is produced in areas where the species has a climate match
C9. Spread disease (1-2)	2	Mammal
C10. Harm to property (0-3)	0	<\$100,000 / year
C11. Harm to people (0-5)	2	Injuries or harm or annoyance likely to be minor and few people exposed
Stage C. Consequence of Establishment (risk that an established population would cause harm)	Consequence Risk Score = sum of C1 to C11	Consequence Risk Ranking C > 19, Extreme C = 15-19, High

	= 4	C = 9-14, Moderate C < 9, Low = < 9, Low
ASSIGNED THREAT CATEGORY:	EXTREME SERIOUS MODERATE LOW EXTREME UNTIL PROVEN OTHERWISE	
PROPOSED IMPORT CLASSIFICATION:	PROHIBITED IMPORT RESTRICTED TO THOSE LICENCE HOLDERS APPROVED FOR KEEPING SERIOUS THREAT SPECIES IMPORT RESTRICTED TO THOSE LICENCE HOLDERS APPROVED FOR KEEPING MODERATE THREAT SPECIES IMPORT PERMITTED
