

## Summary of Crop Protection Permits (now Property Protection Permits) issued by species financial year between the 1 July 2019 and 6 June 2022

- The below data was generated for the three financial years; 2019-20, 2020-21 and 2021-22.
- It should be noted the increase in number of Bennetts and rufous wallaby and brushtail possum permits is due to the first tranche of five-year permits for these species issued in 2016 expiring hence their renewal in 2021.
- Similarly, the number of fallow deer antlerless permits was reduced in 2020-21 relative to the previous financial year because five-year permits for this species began in 2020.
- Crop Protection Permits were discontinued from 1 December 2021 and replaced with Property Protection Permits.
- \*The minor reduction in the number of Crop Protection Permits previously reported is attributable to the cancellation of incorrectly issued permits now being rectified within the permitting and licencing system.

Species	1 July 2019 to 30 June 2020 inc.	1 July 2020 to 30 June 2021 inc.	1 July 2021 to 6 June 2022 inc.
	Permits Issued	Permits Issued	Permits Issued
